# COYOTE® STP-JR (Service Termination Point)

Description

Network operators value the security of each splice and desire rugged closures along the entire fiber route to ensure that they can maintain the high level of service today's customers demand. Traditionally, fiber optic products offered to address the last connection point at the customer premises have been less durable and contain marginal sealing systems. Since every splice in your network is critical, why risk compromising your service levels at the final connection? With the COYOTE® STP-JR, you no longer have to.

The COYOTE® STP-JR is a small scale, cost effective closure which provides an alternative to traditional network interface devices, while offering much greater application flexibility. The robust latch system, paired with an integrated overmolded cover, allows for quick re-entry and creates a secure seal over a wide range of cable profiles.
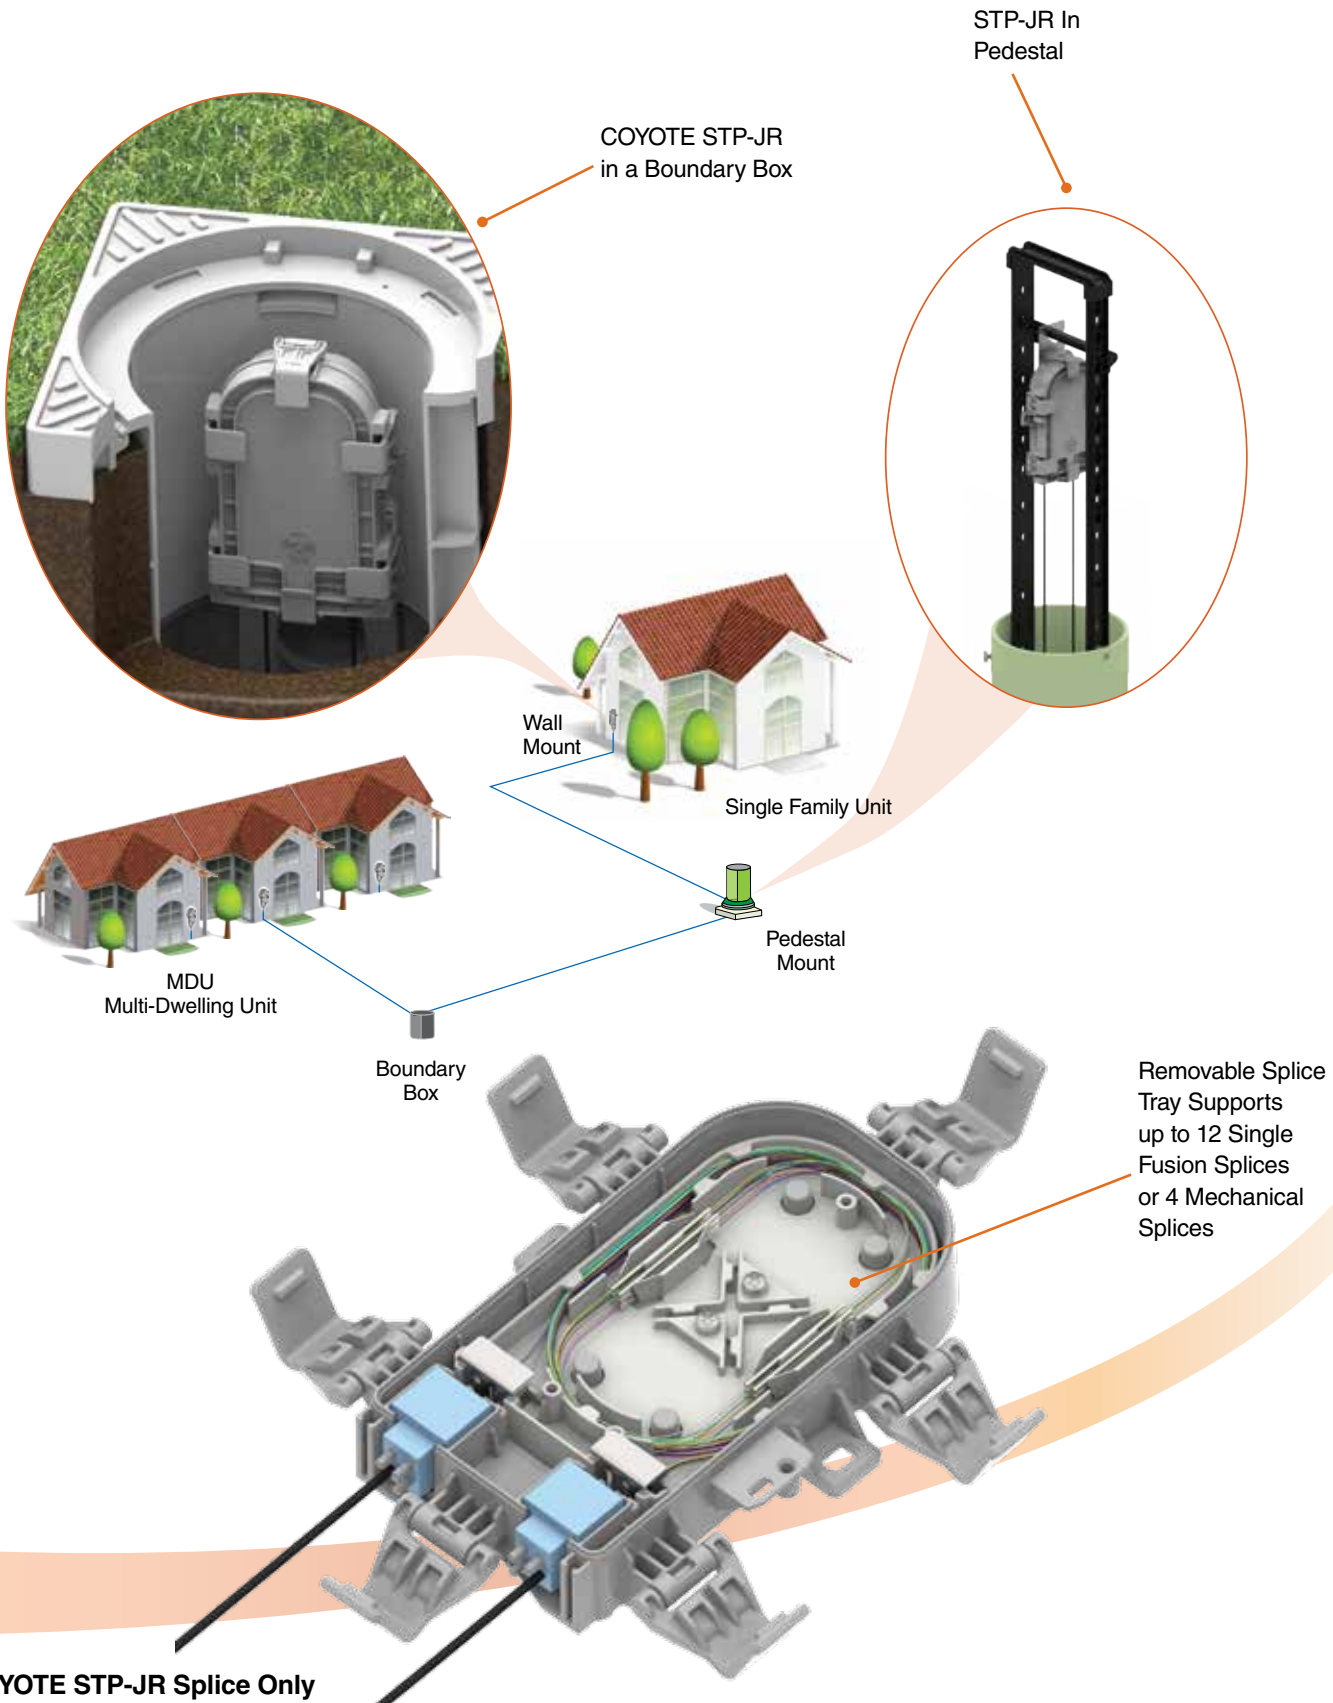

Features

Size	8" x 4.8" x 1.9" (200 x 125 x 49 mm)
Application	Indoor/Outdoor Premises, Pedestal, Wall/Pole Network Interface Device (NID)
Degree of Protection	IP-68
Material Construction	Rugged UV Stabilized, Flame Retardant Material (UL94-5VA Rated)

Max Splice Capacity	12 Single Fusion, 4 Mechanical
Max Adapter Quantity	2 Simplex SC, 2 Duplex LC
Grommet Quantity	2 (Multi-Hole Grommets Available)

Overmolded Removable Cover

Fiber PIck

Adapter Bulkhead

Closing Latches
